Career Objective

I'm advancing my skills in front end web developing and I'm also enrolled at Alx where I'm currently studying backend web development. I 'm aspiring to be a full stack web developer. I also want to leverage my knowledge in industrial management, entrepreneurship, and emerging technologies to develop innovative business solutions, drive digital transformation, and create sustainable ventures that deliver value to communities and markets.

Profile Summary

Innovative and results-driven aspiring entrepreneur with a background in industrial management and a strong interest in leveraging technology for business growth. Skilled in project planning, business development, and problem-solving, with hands-on experience in academic and personal projects across tourism, digital solutions, and enterprise management. Passionate about creating sustainable, tech-enabled ventures that address real-world challenges while fostering community impact. I'm also familiar with programming languages like HTML CSS JAVA JAVASCRIPT and I'm currently yearning to dive into python.
